PAXOS Vertical Flybar

Applications:
- Live sound for rental application in mid& large-size venues
- Permanent installation in theatres, houses of worship, convention centers, ballrooms.

Description:
- Vertical Flybar for hanging PAXOS systems.
- It can be used in vertical suspension and ground stacking (without upper flybar).

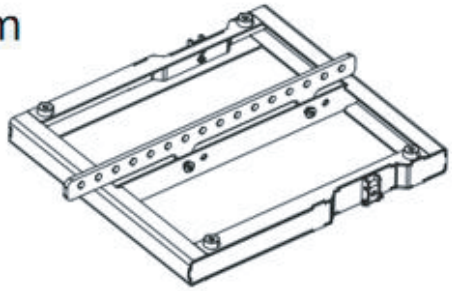

Caution:
- The suspension fittings are designed for use with the PAXOS system and are not suitable for use with other models.
- The suspension fittings used must be securely fastened to the sound diffuser, ceiling, or other supporting structure. When installing components on ceilings, floors, or beams, ensure that all fixing and connection systems are of appropriate size and load-bearing capacity.
